Al Khobar, Saudi Arabia
Transferable Iqama

Full-stack developer and project manager based in Al Khobar, Saudi Arabia. Experience in logistics systems, Python/Flask, PHP/Laravel, WordPress, and team delivery. Most recently worked at iLab / SpeedLogi from September 2025 to September 2026. Actively seeking new opportunities.

Professional Experience

Project Manager & Full-Stack Developer

iLab Information Technologies / SpeedLogi - Al Khobar, Saudi Arabia | September 2025 - September 2026

- Managed SpeedLogi technology projects from planning through delivery
- Developed and maintained internal systems as a full-stack developer
- Designed and built DOBS (Python/Flask) and the DMS platform (Laravel) with its Flutter Android driver app
- Coordinated teams, requirements, releases, and on-time delivery across web and mobile systems

Project Manager & Senior WordPress Developer

The MK Solution - Rawalpindi, Punjab | May 2018 - March 2024

- Managed a 10-person cross-functional team on high-visibility projects
- Led complex WordPress builds using Elementor
- Implemented SEO, security, and responsive design best practices
- Mentored junior developers and improved delivery standards

WordPress Developer (Freelance)

Upwork - Remote | January 2020 - December 2023

- Built custom WordPress themes and designs with Elementor
- Maintained multiple websites with updates and troubleshooting
- Enhanced sites using HTML, CSS, PHP, and JavaScript
- Delivered high-quality results on tight timelines

CSR & Technical Support Specialist

Customer Service & Technical Support - Rawalpindi, Punjab | February 2016 - January 2017

- Responded to technical inquiries from internal and external users
- Troubleshot software and hardware issues via phone, email, and chat
- Resolved technical problems efficiently to ensure satisfaction

Skills

- Frontend: HTML, CSS, JavaScript, React, Bootstrap
- Backend: PHP, Python/Flask, Node.js, Django
- Databases: MySQL, PostgreSQL, MongoDB
- Mobile: Flutter, Android
- Tools & Productivity: Git, Postman, Figma, Jira, Trello
- Adobe & MS Office: Adobe Creative Suite, Microsoft Office (Advanced)
- Web Platforms: WordPress, Elementor
- Project Delivery: Agile, Team Coordination, Stakeholder Management, Sprint Planning

Selected Projects

DOBS: Driver Onboarding & Offboarding System

DOBS, a Python/Flask system I designed and developed end to end to run driver onboarding and offboarding across HR, fleet, finance and operations teams.
www.codewithusman.com/projects/driver-onboarding-system/

DMS: Driver Management System & Android Driver App

DMS, a Laravel platform and Flutter Android driver app I designed and developed to run daily logistics operations, covering drivers, fleet, payroll, attendance and communication.
